Substation Flexible Jumpers:
Configuration Drawings

Super-flexible Busbar Jumpers, 1KA - 4KA

Eliminate bushing fatigue and failures caused by rigid conductors or corroded, once flexible, conductors with custom super-flexible jumpers. Use our stainless steel shear-nuts with the jumpers to make repeatable and reliable electrical connections to electrical equipment.

SHORT SPAN FLEX BRAID JUMPERS: 1 KA, 2 KA, 3 KA AND 4 KA

ALL JUMPERS ARE DESIGNED TO HAVE A MAXIMUM TEMPERATURE RISE OF 33°C
AT 25°C AMBIENT TEMPERATURE.

JUMPERS CAN BE SUPPLIED WITH UV STABLE, TRACK RESISTANT INSULATION FOR
WILDLIFE PROTECTION. CONSULT FACTORY FOR YOUR SPECIFIC REQUIREMENTS
